

# Zivaro Securely Enables Your Cloud Journey

## WHERE DO YOU START - OR RESUME - YOUR CLOUD JOURNEY?

Zivaro helps the Cloud enablement needs of regulated market customers through our experience in the design, deployment, and management of applications on Amazon Web Services (AWS).

No matter where you are in your digital transformation, Cloud Services are a part of the equation. Having a partner to fill the gaps in your internal resources, experience, and skillsets is invaluable. While most businesses are doing something in the Cloud, with countless choices, platforms, and specializations, it's easy to become overwhelmed.

Our customers benefit from the rigorous security controls, and continuous monitoring of the National Institute of Standards (NIST) 800.53 v. 4, and our 24x7 managed Platform-as-a-Service (PaaS) team and certified AWS personnel give you peace of mind.

### CLOUD SERVICE CAPABILITIES:

Platform-as-a-Service (PaaS) on AWS

Application Cloud Migrations

Cloud Security Assurance

Landing Zone Preparation & Deployment

# Our past performance speaks for itself.

**Zivaro was one of only eight prime contractors to participate in the Department of Interior (DOI) Foundation Cloud Services Contract in 2012.**

Our team of AWS certified architects provide AWS Cloud services, from underlying compute and storage, to the development of specialized Platform-as-a-Service (PaaS) offerings for solutions like Geospatial Information Systems (GIS), to bureaus across the DOI as well as FEMA and the Army Corps of Engineers.

## Operational Transformation

With our expertise in Cloud-native platform management, Zivaro helps clients increase transparency in operations, improve cost allocation, enhance agility, and speed up time-to-market.

## Governance, Risk & Compliance

Our team of AWS certified architects provide AWS Cloud services, from underlying compute and storage, to the development of specialized Platform-as-a-Service (PaaS) offerings for solutions like Geospatial Information Systems (GIS), to bureaus across the DOI as well as FEMA and the Army Corps of Engineers.
